Our STAVANGER family –
SMART solutions for any assignment

STAVANGER – a synonym for quality

Proven in the field and well equipped for the future – when it comes to quality, our STAVANGER XL bags and backpacks are state of the art across many areas of emergency medical aid. Continuous development makes our product series unique, innovative, and robust.

UNIQUE

The STAVANGER was created as the perfect alternative for aluminum cases and meanwhile convinces even the toughest skeptics. The backpack bag is impressive with its robust, case-like exterior and its spacious interior arranged in clearly structured modules. The roomy, sturdy system modules are intelligently coordinated to allow a variety of possible combinations. This guarantees optimal use of the bag's interior.

INNOVATIVE

The advantage of the STAVANGER backpack bag in comparison to a case lies in its carry system. The bag can be comfortably carried as a case using the 2-piece, disinfectable handle. For longer walking distances, it is recommended to use it as a classic backpack. STAVANGER backpacks have ergonomically shaped shoulder straps with a wide shoulder support and an additional back pad. The original 3M™ reflector stripes ensure high visibility both day and night – a must-have for your safety.

STABLE

Even though it is now lighter in weight overall, the STAVANGER backpack has become more robust and durable due to additional edge support and the use of original CORDURA® fabric, particularly in areas subject to greater stress and wear. In these areas pyramid feet additionally protect both the fabric and the bag. CORDURA® fabric is non-absorbent, making it easy to clean even when heavily soiled.

+ IN DETAIL

STAVANGER + – with **magnetic** interior

STAVANGER + sets standards when it comes to cleaning and hygiene. The magnetic system provides diverse options for arranging different-sized container modules in the bag, maintaining the clarity of overview and modularity that is customary with our products. This innovation makes Velcro straps completely unnecessary. The smooth surfaces both inside and out make for effortless cleaning and disinfection.

Generous space, flexible storage container modules, its clear organization, and a lot more make this bag an indispensable companion in daily life.

Your advantage:

- Effective usage of space
- Ergonomically shaped shoulder straps for highly comfortable carrying; removable chest and waist straps
- High-quality, 2-way zipper with protective flap on bottom
- Individual configurations with variable modules

Original 3M™ Scotchlite™ reflective material for high visibility

Exchangeable Velcro label with customizable identification

STAVANGER + XL is also available as a trolley with internal frame

STAVANGER WITH VELCRO SYSTEM

IN DETAIL

The classical STAVANGER bags

Our STAVANGER emergency bags with Velcro system are our classics. The carrying system is equipped with ergonomically shaped shoulder straps, wider shoulder support, and an additional back pad. STAVANGER bags are more durable and robust thanks to additional edge support.

Safety was increased as well: The original reflective strips by 3M™ with their optimized reflectivity ensure high visibility both day and night.

Your advantage:

- Interior partitions fitted with Velcro for flexible configuration of the container modules
- Self-erecting divider for flexible storage of items
- Ergonomically shaped shoulder straps to ensure perfect carrying comfort, with removable waist and chest straps
- High-quality, 2-way zipper with protective flap on the bottom

Exchangeable Velcro label with customizable identification

Sealable module system

Single-hand zipper – when every second counts

STAVANGER VARIO

VANGER
VARIO

IM DETAIL

STAVANGER VARIO – a doctor's bag with the perfect shape and function

The doctor's bag STAVANGER VARIO is impressive in look and quality. In addition to its appealing design and high-quality materials, the bag offers every convenience necessary, especially for home visits.

Developed primarily for doctors, care services, midwives, and emergency medical services, the STAVANGER VARIO is made of original CORDURA® fabric and high-quality, easy-to-clean tarpaulin material and offers a number of special features. It is spacious, flexible, organized and helps you keep a clear and manageable overview. It is an indispensable companion in your daily work life.

Configure the bag according to your personal preferences. If you only need the main compartment with a small clinical diagnostic kit and a document folder, simply remove the side elements. These are fixed with magnets and are additionally secured with straps. The two side elements can be combined and carried separately.

STAVANGER DOKU

IN DETAIL

Document folder **STAVANGER DOKU** – Our organizational talent in a compact form

The STAVANGER DOKU complements our STAVANGER series perfectly. The DIN A4 document folder is made for operational managers, group leaders, and supervisors. It helps bring organization into hectic work situations. It features high-quality, robust workmanship and the smart design we have come to expect from STAVANGER.

There is a clipboard pocket on the front and a transparent pouch for a tablet or map on back.

The STAVANGER DOKU provides well-organized interior partitioning with various pockets and compartments. The universal transparent pouch on the central divider protects your tablet from external influences.

Your advantage:

- 2-ring file
- Reflectors by 3M™
- 3 removable key clips
- Comfortable carrying handle and shoulder strap
- Clipboard pocket

STAVANGER DOKU

INDIVIDUAL

You have a specific assignment, but not the right bag?

No problem! We customize individual bags and rucksacks according to your needs and wishes.

Our customized emergency aid bags and rucksacks provide more mobility, comfort, organization, safety, and visibility when in use – essential benefits when every second counts.

In addition, the colors red, black, yellow, blue, and camouflage are only a small selection of what is available to create your own individual emergency bag or rucksack.
