STAVANGER XL4000

3 mesh compartments
for the storage of
gloves

Safety belt for
oxygen module

Quick access to essentials

We have refined our proven STAVANGER XL models. As of now, the emergency backpacks are also available with a front pocket. The advantage is obvious: Quicker access to emergency equipment, such as all common AED models or as an alternative to the XL container and system modules, such as the ampoule kit. The transparent front pocket with variable interior division also allows increased viability of packed items. If you don't like that, you can cover the front with the included insert. A new feature is the compartment for the immobilization collars or even documents, which is almost invisibly connected between front and inner body.

Proven magnet system
